

Suite Living Senior Care

Vadnais Heights
Little Canada

Roseville
North St. Paul

June 30, 2020

Families & Potential Families of Suite Living:

We are accepting admissions, even during this COVID time. While the process may look a little different than before, we are confident that we can continue to provide the same excellent care as prior to COVID.

We also wanted to touch on the Infection Control efforts we've made during this COVID time to assure you that we are leaving no stone unturned in keeping your loved ones safe. We've implemented:

- Screening of all staff (temp and O2) at the beginning of each shift. (This has been done since the beginning of our lockdown)
- Screening of all residents twice daily of temp and O2. (This has been done since the beginning of April on guidance from MDH)
- Screening of any vendors/visitors upon entry of temp and O2 (Food Service Delivery, Hospice, and as of today – families visiting on patios!)
- We have a stock of the required PPE not only for a COVID-free building but also COVID-positive buildings.
- While we encourage great handwashing, MDH and the CDC say that when you *think* your hands are clean you tend to not wash properly – so we have hand sanitizer available for all in the building as both entities say that will kill the germs properly.
- We had MSP Electrostatic Disinfecting (check out their website at www.mspelectrostatic.com) out to all of our locations last week to disinfect. This is the cleaning you may have seen being done on airplanes and in hotels. They spray a positive-charged disinfectant that is EPA approved to kill COVID.
- We are wearing masks (cloth is confirmed ok at COVID-free locations and medical for COVID-positive). At COVID-positive locations we are also wearing face shields or eye protectants like glasses or goggles. When treating a COVID-positive resident we are adding gowns, hair bouffant, and shoe cover booties.
- Our Housekeepers are using the same disinfectant we've always used which has a 45 second kill tie for COVID.

Thank you for your patience and understanding. If you have any questions regarding our infection control or any other aspect of our care during this COVID time please don't hesitate to reach out to the Management at your location or any of the three of us!

Stay Healthy!
